

Anti-aging | Skin Tightening | Lines and Wrinkle Reduction | Removal of Sunspots, Freckles, DPNs, Warts, Skin Tags | Scars and Acne Scaring | Stretch Marks

Plasma Technology is an innovative, leading and non-invasive treatment that uses Plasma to treat a wide range of conditions.

Plasma is often referred to as “the fourth state of matter. When the tip of the device is close enough to the skin, the air between the tip and the skin mixes with oxygen and nitrogen in the atmosphere and creates a plasma arc (micro lightening).

The Plasma arc evaporates upon contact of the skin but causes a very targeted ablation (removal) of a very thin layer of the skin tissue resulting in immediate contraction and formation of collagen fibres essential for skin-tightening.

Our **CE Medically Certified Plasmatek™ Wireless** comes with an ablative (non - invasive with some downtime) and non-ablative probes (no downtime), offering a variety of treatments that are effective, reliable and safe for **ALL skin types**.

ABLATIVE TREATMENTS (MINIMAL INVASIVE WITH SOME DOWNTIME)

Area	Price	Package of 3
